Waterfall, Agile

EXPERIENCE

ZAPP, LONDON

Frontend Developer | 2020 - Present

Zapp is an app for managing issues in the software development lifecycle. Zapp is designed with small teams in mind and aims to make issue tracking simple and straightforward.

- Worked in a team of 3 following agile principles, and implemented Git Workflow.
- Designed and built the front-end using React JS and CSS tailwind.

- Utilised TypeScript to ensure type safety and reduce number of bugs during the production process.

Deployed app - [Zapp Tracker](#)

CYCLE FLOW, LONDON

Full-stack Developer | 2020

Cycling web app that allows users to log and flag issues on London cycle routes through the Twitter API. Users can send issues to CycleFlow twitter account which is fetched and rendered onto the app dashboard.

- Created full end to end app from design to build.
- Tech stack includes socket.io, Javascript, Express and Twitter API.

NPM REACT TIMELINE, LONDON

Frontend Developer | 2020

NPM package that offers a fully customisable timeline for users to import into their projects.

- Worked with the developer to add frontend testing to the NPM package using Javascript testing framework, Jest.
- Package utilises React and Styled Components.
- Package can be found on the NPM library under react-customizable-timeline

ARCADIA GROUP, LONDON

Senior Buyer | Jan 2017 - 2019

- Category managed the companies visual and creative services with a spend of £6m.
- Liaised with large number of internal and external stakeholders ensuring best value to the business.
- Regularly presented to our group finance director and CEO about category strategy and savings.

EDUCATION

CODEWORKS, LONDON

Software Engineering | 2020

- Top rated full-stack coding course in Europe
- Front-End Frameworks (Angular, React, Redux).
- Back-End Frameworks and Databases (Node, Express, Koa, GraphQL, SQL, MongoDB).

DURHAM UNIVERISTY, UK

Applied Social Sciences

- Specialised in Sport and Economics gaining a 2:1 with honours.
